# DELAWARE<sup>®</sup> HOSPICE

Since 1982

Care focuses on meeting the physical, emotional, and spiritual needs of patients and families with life-limiting illnesses through the care of a multi-disciplinary team. Patients may require different levels of care. Delaware Hospice offers all levels to meet the needs of individuals including routine home hospice care, inpatient hospice care, respite care, and continuous hospice care. Medicare, Medicaid, and most insurance plans will cover all of hospice care.

## Delaware Hospice Center

While keeping patients comfortable and safe when symptoms or pain arise, the Delaware Hospice Center is an alternative to going to the hospital. Specialized 24 hour care is provided for symptom management.

# DELAWARE<sup>®</sup> PALLIATIVE

A Program of Delaware Hospice

Let Delaware Palliative help you live your best life! Nurse Practitioner and Social Worker visits work to help you or your loved one live with a serious illness. We work side by side with your physician to help you to understand your illness and treatment options. All types of curative treatments may be continued while receiving this support. From the comfort of your home, you will receive the help you need to manage your symptoms, connect with community services, optimize your capabilities, and above all else, improve the quality of life. Our team can make it easier for you and your loved ones to talk about end of life goals and decisions by leading those conversations. Medicare, Medicaid, and some insurance plans will cover all or a portion of palliative services, however, copays/coinsurance/ deductibles will apply.
